PVC FOAM BOARD

PVC foam board is a lightweight board made primarily from polyvinyl chloride (PVC) through a foaming process. It combines the advantages of both plastic and wood and is widely used in advertising, furniture, construction, decoration and many other fields.

Application scenarios

● Bathroom cabinet

● Kitchen cabinet

● Partition board

● Engraving and carving

● Storage rack

Features

1. Lightweight, damp-proof, anti-mildew, non water absorbing, and its anti-vibration.
2. Good sound insulation, heat insulation, water proof, anti-ultraviolet, anti-corrosion.
3. Good self extinguishing function, it can stop the fire by itself, so it's of good fire in sulation, you can use it safely.
4. The board can be used to thermal moulded, be heated to curve, and puckered.
5. The boards are anti-aging and easy to clean.

Application

1. Advertising: signboard, exhibition board, screen-printing board, solvent-printing board, engraving board etc..
2. Construction Field : out side wall boards of the building, inside boards for decorations, residences, offices, disjunctive board in public, decoratingshef for commercial use,none-dust indoor boards, ceiling boards etc..
3. Industrial Applications: steamships, planes, cars, carriages of the trains, celinas, the core level of the carriage, boards for interior decoration santespsis project in chemical industry, thermal moulding piece, boards for refrigerator, special coldness keeping project, boards for environmental use etc..

WPC BOARD

WPC wood-plastic board is a new type of eco-friendly material made by using polyvinyl chloride (PVC) resin as the main base material, mixed with a certain proportion of wood powder or plant fiber, and combined with stabilizers, lubricants, foaming agents, fillers, and colorants. The mixture is processed through high-temperature blending and extrusion molding.

1220*2440mm

Thickness : 3-30mm

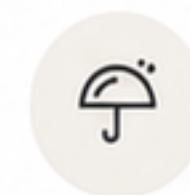

Features

PVC wood-plastic material (WPC Celuka Foam Board) is PVC resin and wood in organic and organic combination of the preparation through the series of advanced technologies, the extrusion foam molding, a wood-plastic sheet, extrusions, bar. As the use of the raw materials and production processes do not use glue bonding, no formaldehyde, benzene, ammonia, trichloroethylene, and other harmful substances. And it has water proof, anti-UV, coloring good performance, heat insulation, noise, acid and alkali resistance, insulation, fire-retardant, anti-corrosion, anti-mildew and anti-pest, moisture resistance, sawing, planing nails, and a good mechanical processing performance with natural wood and wood grain nature of flu, and overcome the inherent natural wood cracking, warping, color, mycophenolate natural defects and 100 percent recovery, is a jewel of wood instead of the traditional green of new materials.

Application scenarios

Wood-plastic material

Waterproof

Quick installation

Convenient for cleaning

Flame retardant

Free combination

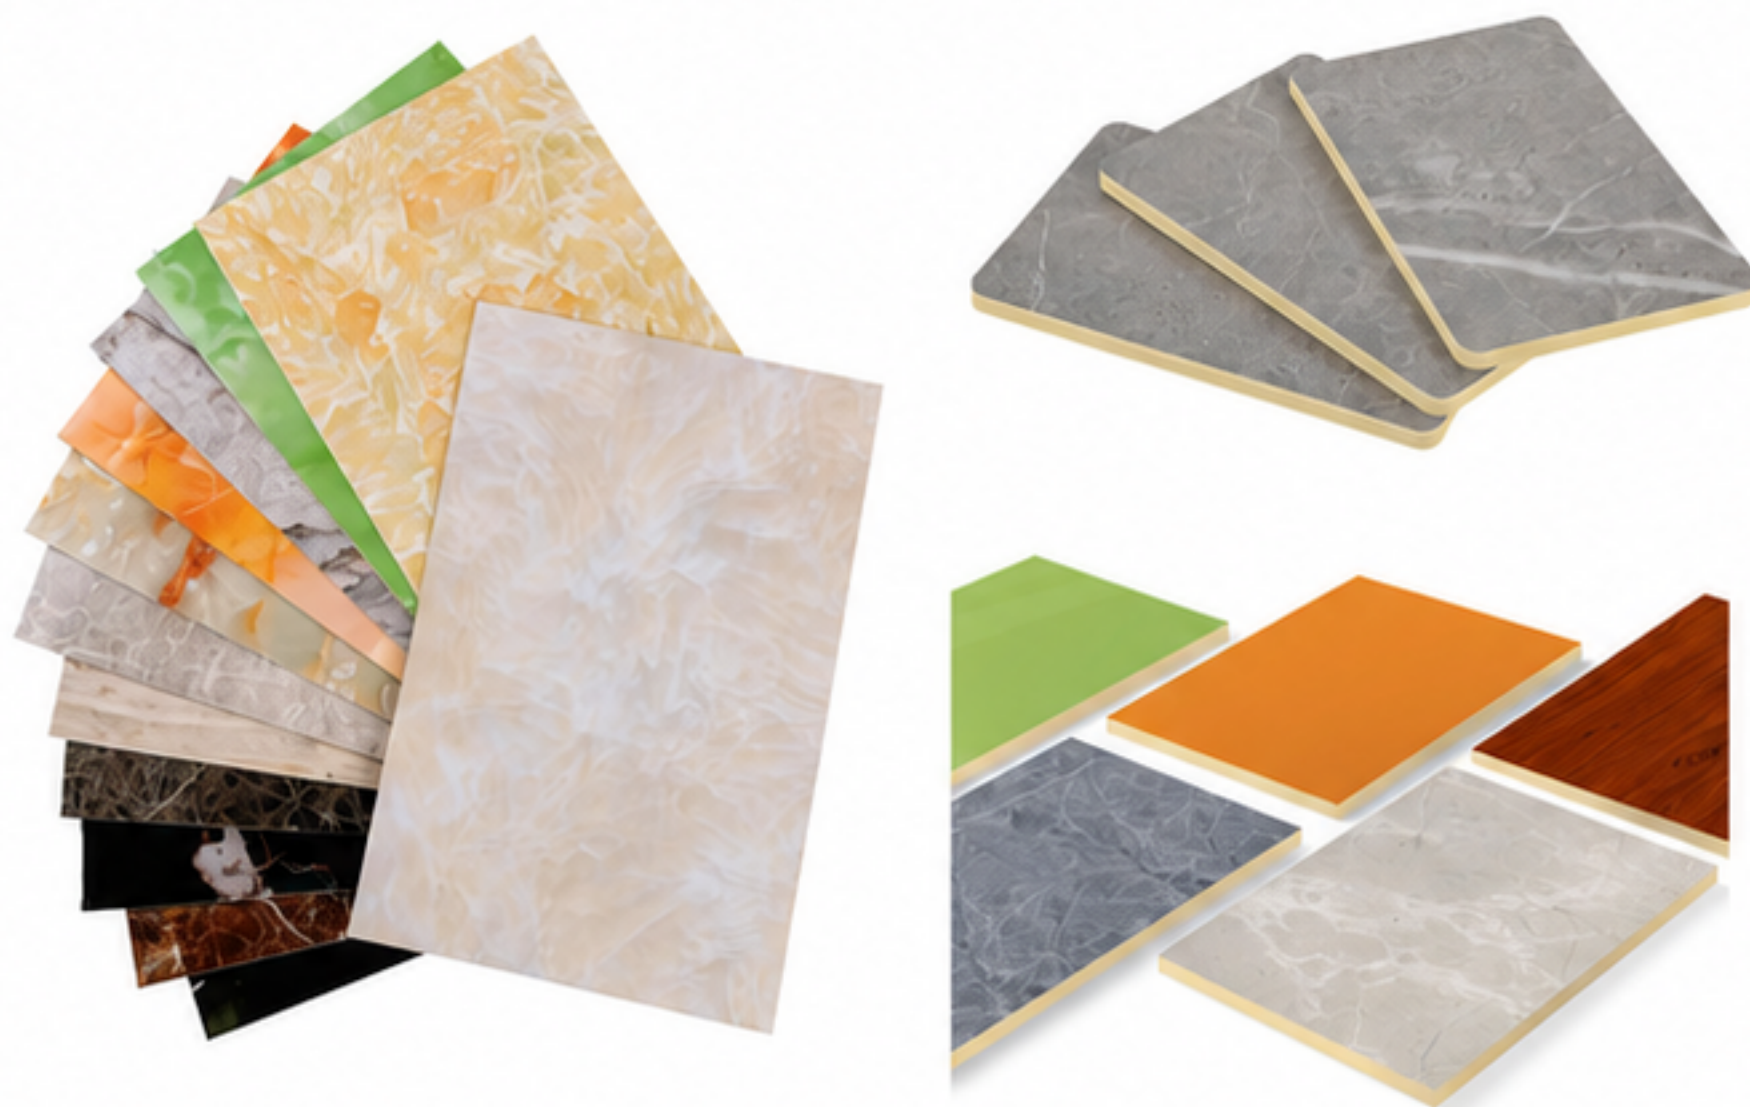

Summary

WPC board = "water-resistant wood". It not only has the texture of wood but also completely bids farewell to the troubles of insect infestation, cracking, and painting. It is mainly used in outdoor flooring, kitchen and bathroom furniture, and exterior wall decoration.

PVC LAMINATED BOARD

PVC paint-free board marble series is a high-density PVC base material with a high-simulation marble texture decorative film (hot-melt online composite). It comes with a finished surface from the factory—no need for painting or hanging—and can be directly cut and edge-sealed for wall or cabinet display. Common thicknesses range from 3 to 30 mm, with standard sizes of 1220×2440 mm. Customization is available.

Features

- True stone appearance:** Zero paint, natural texture, and premium finish.
- Eco-friendly & lightweight:** Environmentally friendly, easy to transport and install.
- Durable performance:** Waterproof, mold-proof, scratch-resistant, wear-resistant, and cost-effective.
- Fire safety:** A/B grade flame retardant for enhanced protection.
- Wide applications:** TV and sofa background walls, entrance and feature walls, bathroom walls, kitchen splash guards, elevator door casings, hotel lobbies, elevator halls, chain restaurants, shopping malls, KTV rooms, bar fronts, desks, exhibition and display walls, and more.
- Seamless matching:** Coordinated cabinet panels, wardrobe accents, bar fronts, and washbasin side walls with same-color edge banding for a unified "board-to-wall" finish.

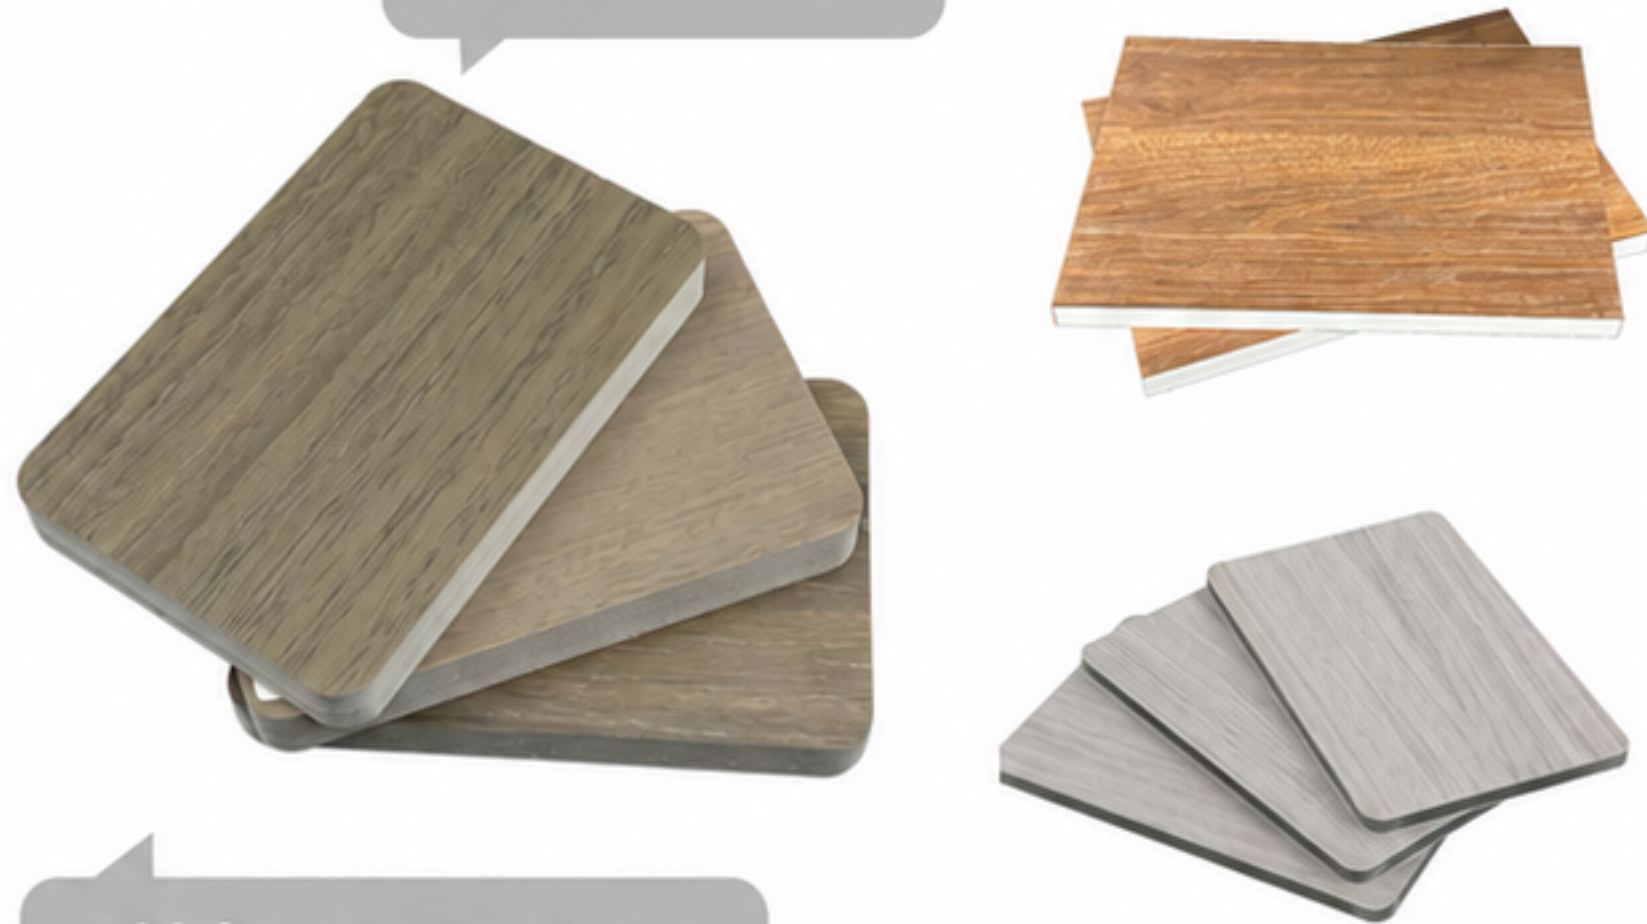

Summary

JINYOU PVC laminated boards combine an environmentally friendly, flame-retardant, moisture-proof, scratch-resistant, labor-saving, and cost-effective solution in one. They are the ideal choice for "ready-to-move-in" furniture and commercial spaces.

PVC LAMINATED BOARD

The PVC paint-free board wood grain series combines the "real wood grain effect" with "PVC zero paint, moisture-proof and flame-retardant". Its price is only 60% of that of real wood veneer, and its processing is as simple as that of woodwork boards. It is an ideal choice for "install and move in immediately" log style custom furniture and kitchen and bathroom Spaces.

1220*2440mm

Thickness : 3-30mm

Features

Middle core layer: High-density extruded PVC board (density 1.35- 1.45g /cm³), thickness 3- 30mm selectable.

Surface decoration: 0.1-0.2mm PVC wood grain film, processed by four-color gravure printing + embossing, simultaneously achieving deep moisture-proof and flame-retardant wood grain. Realistic wood grain: with hundreds of patterns including walnut, oak, cherry, maple, zebra, shadow wood, etc. Scratch-resistant, easy to wash, and convenient to process: can be sawn, milled, drilled, and bent

Protective film: UV scratch-resistant coating is optional

Application scenarios

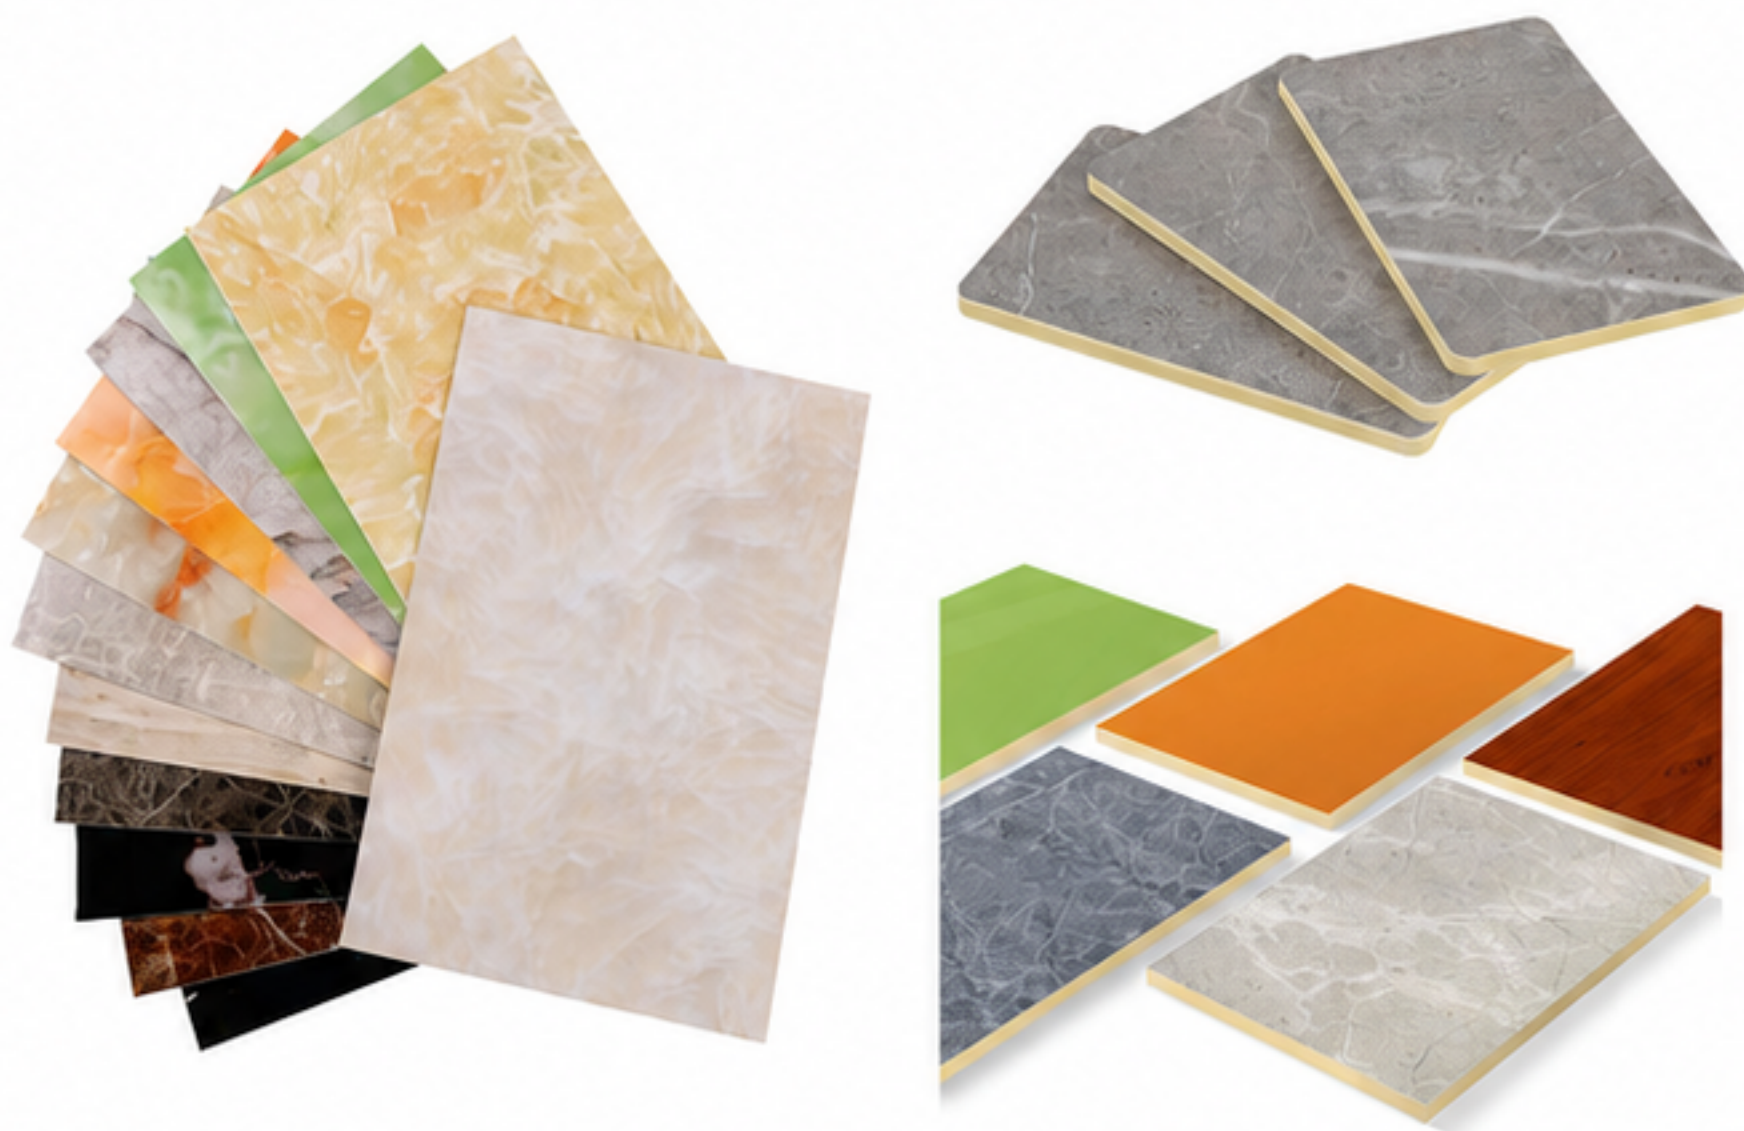

Summary

PVC laminated boards package "environmentally friendly, flame-retardant, moisture-proof, scratch-resistant, labor-saving and cost-effective" in one go, making them the top choice for cost-effectiveness in "ready-to-move-in" furniture and commercial Spaces.

PVC LAMINATED BOARD

PVC paint-free board marble series = high-density PVC base material + high-simulation marble texture decorative film (hot-melt online composite). It comes with a finished surface from the factory, no need for painting or dry hanging, and can be directly cut and edge-sealed for wall or cabinet display. Common thicknesses range from 3 to 30 mm, with standard sizes of 1220×2440 mm. Customization is available

Features

True stone appearance, zero paint, environmentally friendly, lightweight, labor-saving, A/B grade flame retardant

Waterproof, mold-proof, scratch-resistant, wear-resistant and cost-effective

Main uses: TV/sofa background wall, entrance hall, wall skirt, bathroom wall, kitchen splash guard, elevator door casing.

Business: Hotel lobbies, elevator halls, chain restaurants, central columns in shopping malls, KTV private rooms, bar front desks, exhibition hall image walls.

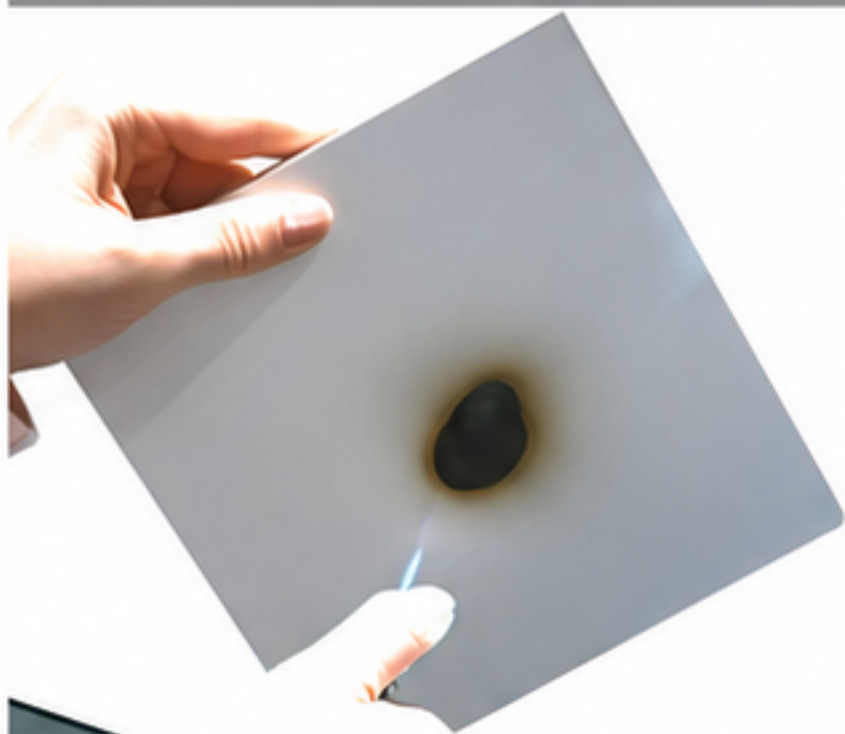

Public/Medical

Furniture matching: The side of the cabinet island, the side decoration of the wardrobe, the facade of the bar counter, and the side wall of the washbasin. The same-color edge banding strips achieve "board and wall integration".

Summary

PVC laminated boards package "environmentally friendly, flame-retardant, moisture-proof, scratch-resistant, labor-saving and cost-effective" in one go, making them the top choice for cost-effectiveness in "ready-to-move-in" furniture and commercial Spaces.
